Projects

Travelit

- Travelit is an innovative **Travel Management System** developed as a group project for the OUSL BSE degree program.
- It consists of a web application for travel agents, built with **Node.js, Express.js, and React.js**, and a mobile app for travelers developed using **React Native**.
- The system aims to streamline operations for small-scale travel agents and enhance the travel experience for users.
- As the team leader, my responsibilities included managing the Kanban board using **JIRA** as the project management tool, maintaining meeting minutes, following CMMI guidelines, and actively contributing to development and testing with **JavaScript** language.

Clothify

- ShopMe is an **e-commerce mobile application**.
- Aimed at supporting small-scale clothing merchants in enhancing their business operations.
- A user-friendly and innovative platform for efficient online business management. Users can register as either a customer or a seller.
- Utilized **Android Studio** for the app's development with **java** as the language.

Travel 360°

- **Front-end design** of a website for a tourism site.
- Allow user to plan the whole trip at one place.
- Provide information about Interest places, culture and other related websites.
- To Do list for get things organized.
- **HTML, CSS, JavaScript, VueJS.**

Fitness Buddy

- Fitness web application to manage the Workout routine.
- With user authentication.
- **MERN Stack, Postman API.**

Work experience
